

## Complete installation system

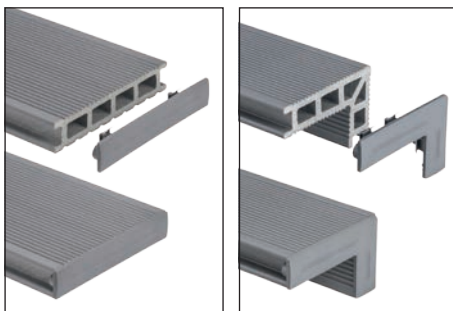

# UPM ProFi **End Cap**

## gives final touch to your decking

10<sup>years</sup> of UPM ProFi  
Design & Performance

designed in **FINLAND**  
made in **GERMANY**

**UPM ProFi Deck 150 End Cap and  
UPM ProFi Rail Step End Cap**

UPM ProFi's complete installation system has been supplemented with a new product that allows the terrace to be finished beautifully quickly. In addition to the traditional **UPM ProFi Cover Strip** and the **UPM ProFi Rail Step**, an alternative is now the **End Cap**. UPM ProFi's patented **End Caps** have a unique locking system that ensures a life time connection.

### End Caps to make your decking look perfect!

- Simple alternative to Cover Strip and Rail Step edging
- Elegant solution for keeping small animals and dirt out of hollow chambers
- Patented locking system to ensure the End Cap remains fixed for the life of the deck
- Made with the same advanced composite material as the deck boards ensuring similar uv resistance and weathering
- In-built ventilation feature allowing condensation/water to drain
- For normal UPM ProFi Deck 150 decking boards and for Rail Step
- Available in 6 colours

### Dimensions

UPM ProFi Deck 150 End Cap: 27 mm x 149 mm x 23 mm

UPM ProFi Rail Step End Cap: 67/27 mm x 109 mm x 23 mm

Complete installation system

# UPM ProFi Heating Cable

to keep your deck warm, comfortable and safe

10<sup>years</sup> of WPC  
technology

UPM ProFi Deck's high impact resistant hollow structure enables intelligent deck design. UPM ProFi Heating Cables can be installed inside the boards to keep the deck warm.

## UPM ProFi Heating Cable

- Keeps deck surface free from ice and snow during wintertime
- Can be inserted into the chambers of UPM ProFi Deck 150 decking boards, even after initial installation
- Plug and Play solution – just a nearby socket needed
- Automatic thermostat regulation, subject to outside temperature
