

# UPM ProFi® Deck, 5 myths busted

## DESIGNED FOR EASY OUTDOOR LIVING

Life outdoors should be special: whether relaxing or working, celebrating or just living.

Whether for residential or harder wearing public decking, UPM ProFi's double protection technology ensures a stain resistant surface and an ultra-durable core.

UPM ProFi Deck is designed to be ultra low maintenance: no sanding, oiling or varnishing is needed. However, as with any outdoor flooring surface, periodic cleaning and correct care is needed to ensure that the deck retains its beauty for many years. \*

Video: Designed for easy outdoor living

**MYTH:**  
Maintaining a deck is too much work.

UPM ProFi Deck is designed for EASY OUTDOOR LIVING.

*"We are very pleased with our UPM ProFi decking. It feels warm and natural to bare feet and it does not splinter like wood. The composite decking can be washed so clean that one can walk on it with socks. We would not have built such a big terrace from a material which requires constant and heavy maintenance."*

In 2010, Family Sinkkonen installed a UPM ProFi Deck in Stone Grey.
