

UPM PROFi RAIL STEP

– make steps and edges quickly and easily

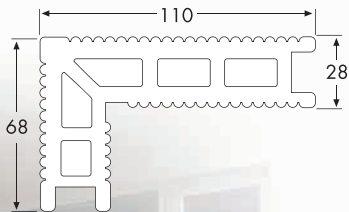

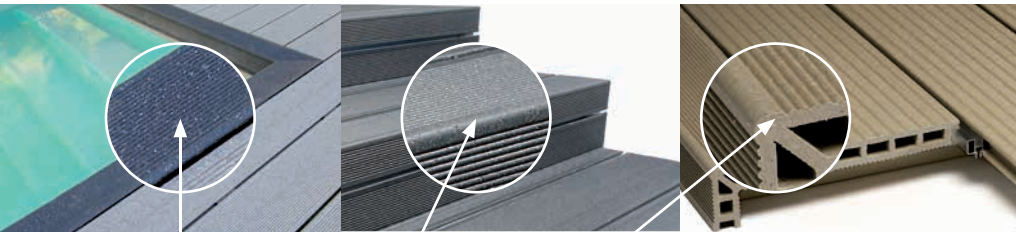

Stay one step ahead

UPM ProFi Rail Step, patented 3-in-1 solution, is designed for creating elegant and hard-wearing terrace edges and pool borders, and stylish steps.

UPM ProFi Rail Step is also a perfect solution for public gardens, marinas and restaurants, where hard-wearing terrace edges are a must.

UPM ProFi Deck modern colours will last throughout the years.

Easy to install

The UPM ProFi installation system has been designed to be quick and easy.

You can create standard-dimension steps with ease by combining UPM ProFi Rail Step with UPM ProFi Deck 150 decking boards and UPM ProFi Alu Support Rails, or create your ideal dimension steps by cutting boards to size.

The unique L-shaped decking rail reduces construction time and creates perfect, precisely-dimensioned stairs. Each piece is produced to the same precise dimensional tolerances. This results in less waste and quicker installation. The material cuts like wood and the light, hollow structure makes for easy handling.

When constructing stairs and installing boards, UPM recommends using UPM ProFi Alu Rail to create a firmer structure. For terrace edging, you can choose either T-clips or UPM ProFi Alu Rail.

UPM PROFIL RAIL STEP

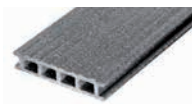

- **Complements UPM ProFi Deck 150 system**
- **Full range of deck colours**
- **Good friction, wet or dry**
- **High impact strength**
- Fresh and modern look
- Superior stain resistance
- Excellent colour durability
- Better scratch resistance
- Recycled and recyclable
