TECHNICAL PROPERTIES

Excellent colour durability: The high performance polymer surface cap is particularly resistant to the sun's ultra violet fading and weathering. UPM ProFi Piazza will keep its colour long after traditional WPC and wooden decks have faded or discoloured.

Exceptional stain resistance: UPM ProFi Piazza has been designed and tested to withstand all typical spills and stains that occur on decks. Whether at a home barbecue or around a swimming pool, UPM ProFi Piazza will continue to keep its looks with minimal maintenance.

Tough to the core: In addition to the hardwearing high performance surface cap, UPM ProFi Piazza features an ultra durable core that will remain structurally sound in direct ground contact or even when installed under water.

Colour durability, stain resistance and structural integrity are all guaranteed for up to 25 years (25 years for residential use, 20 years for commercial applications).

Maintenance: Brushing and the occasional jet wash is normally all that is required. No sanding, varnishing, painting or staining is needed.

COMPONENTS

ALU SUPPORT RAIL SMALL

Extra thin profile (23 mm) for low deck constructions.

PIAZZA COVER STRIP

Enables straight or even curved deck edges.

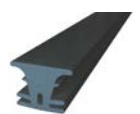

CLICK ALU SUPPORT RAIL LARGE

Subconstruction without screwing to minimise labour.

RUBBER STRIP

For closed deck surface. Provides a typical yacht deck look.

Both Alu Support Rails are available with connector to enable off-cut length optimization.

STAINLESS SCREW A4 4*40

For direct fixing of the deck board, Alu Rail and Cover Strip. Box of 100 units.

START CLIP

For installation of start and end boards.

STAINLESS SCREW A4 4*24

Self-drilling screw for fixing the Alu Support Rail Small. Box of 100 units.

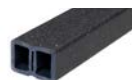

T-CLIP

Fast installation which allows thermal expansion of deck boards.

SUPPORT RAIL

Installation on hard flat surfaces.
